Partner of the industry since 1968

Temperature Measurement Technology
Reliable . Precise . Certified

GÜNTHER – Partner of the industry since 1968

High-quality temperature measurement technology

For over half a century, the name GÜNTHER has been a byword for the most advanced temperature measurement technology.

Our products are renowned for their exceptional precision and handcrafted quality.

Founded by Paul Günther in 1968 as a one-man business, the company originally focused on the manufacture of electrical temperature sensors for industrial furnace applications. Through a continuous expansion of the product portfolio, we are able to meet the needs of almost all applications in a wide range of industrial sectors.

More than 180 employees in 4 European countries put their expertise into our top-quality products, which are used all over the world.

Our second-generation owner-managed company is sure to find a tailor-made solution for you too.

The GÜNTHER customer base

With **over 3000 customers in more than 40 countries worldwide**, the GÜNTHER group is one of the most established companies in the field of industrial temperature measurement. In-house research and development as well as continuous training of our employees enable us to find the most advanced solutions in the field of modern temperature measurement. And that tailored to the needs of practically any industry.

The core business of GÜNTHER

The main field of activity of GÜNTHER GmbH Temperaturmesstechnik is the **development and production of temperature sensors** (resistance thermometers, thermocouples). We have specialised in particular in the production of individual items and small series to meet special technical and design requirements in terms of the shape and composition of the sensors. With our **special solutions and individual custom-made products**, optimised sensors can also be provided for the most unusual requirements and applications.

Furthermore, we also provide the following services:

- Trade in accessories and spare parts for temperature measurement technology
- Calibrations according to DAkkS specifications
- Customer services such as SAT and TUS measurements
- Training of technical personnel

GÜNTHER locations in Europe

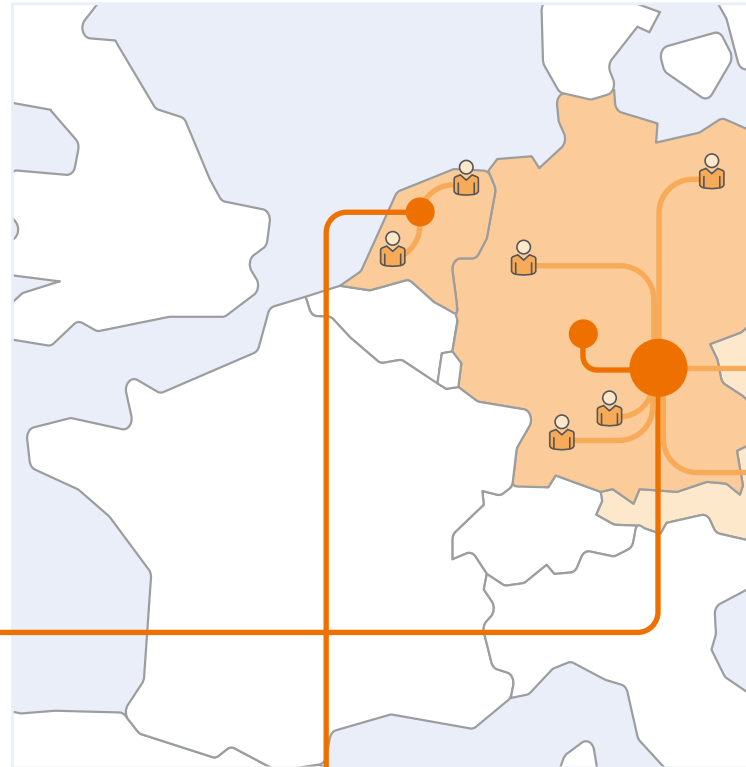

In addition to the **headquarters in Schwaig near Nuremberg**, the GÜNTHER Group has another plant in Linsengericht (Hessen), as well as subsidiaries in the Netherlands, Poland and Romania. The close cooperation between the individual plants, both in the procurement and stocking of materials and in the development and production of temperature sensors, is a decisive component of the GÜNTHER recipe for success. The close cooperation of the individual production facilities ensures constant production capability with short delivery times at all times

Customer service on site

In order to provide a customer-friendly advisory and sales service, our **sales representatives** regularly attend to our customer base.

This means that short-term on-site consultation and prompt order processing can usually be planned and carried out smoothly. And that throughout Europe.

The GÜNTHER Group is also active worldwide, primarily on the American continent, in the CIS states and in various Asian countries. Here, local **sales and trading partners** look after our international customer base.

To ensure optimum order processing, there is close cooperation between our representatives and various in-house departments (sales, quality management, development, production, etc.) at the respective production sites.

Certified Quality

In order to meet the high standards we set for ourselves in terms of smooth internal processes and a consistently high level of customer satisfaction, we work with a quality management system certified according to DIN EN ISO 9001:2015.

In addition, our in-house testing facility, accredited by the German accreditation body DAkkS enables us to deliver temperature sensors with a factory test certificate or a DAkkS test certificate.

Investing in the future

In order to be able to remain one of the best and most innovative technology companies, **we invest in new production facilities and develop our own machines and equipment**, exactly according to our ideas and needs. This enables us to further optimise our production processes and thus make them ready for the future.

The GÜNTHER Corporate Code

As an internationally oriented company with subsidiaries in various European countries, as well as a large number of suppliers and trading partners worldwide, we have set ourselves the goal of acting responsibly and lawfully as a basic prerequisite for the success of our company.

The following points in particular represent the vital cornerstones of our operations:

- We treat all people with appreciation, fairness and respect.
- Our customers and partners are met with utmost respect, appreciation and fairness.
- Ethical and legal standards form the basis of all our operations.
- We encourage each individual to contribute their own ideas and actions and thus to take responsibility for their actions.
- We comply with applicable regulations and the law.
- We ensure that all resources are used responsibly and sustainably for further development.
- We check all purchases and investments for their necessity, environmental compatibility and sustainability.
- Disposal and recycling are handled in an environmentally friendly and resource-conserving manner.
- All employees ensure that energy is not unnecessarily wasted by handling it responsibly.

2018 50-year anniversary of the establishment of our company
